

Sales operations for the relaunch

PREPARED FOR NELLY SUDRI · OCTOBER 2026

You've got the audience and you've got the offer. What's missing is everything between someone raising their hand and the money landing in your account. That's what I build, and then I run it. Live inside 30 days.

First week is an audit. I'll go through what you already have, the Skool community, the old lists, the ClickFunnels stuff, and tell you what's usable and what's missing. Nothing gets built before that.

The build

One time, fixed scope, the same in all three options.

Software	What it's for
GoHighLevel	CRM, pipelines, calendars, forms, automation
Zoom	Calls, with links generated off the calendar
Fathom	Recording and AI notes on every call
Typeform	Qualification answered before anyone picks up
Slack	Alerts to the right person at the right moment
Notion	SOPs, onboarding, tracking
Whop	Checkout, payment plans, failed payment recovery
Zapier	The connective tissue between all of it
Google Workspace	Email, calendar and file access for your team
Loom	Training and SOPs your closers can actually follow
Phone and A2P	Registered number so the text reminders send

If you already use one of these I'll work with what you have. Either way you never have to open the back end.

- 1. Lead capture and attribution.** Every lead in one place, tagged to the exact post or ad that brought them in
- 2. Speed to lead.** Your setter gets pinged the moment a lead lands. If nobody calls, it escalates
- 3. Booking.** Setter and closer calendars stay separate so you can see which path converts
- 4. Show up.** Confirmation, a reminder the day before, a short one an hour out. All of it shuts off on its own if the call moves
- 5. Call recording and disposition.** Recording on every call, plus a disposition system so you know what happened on each one
- 6. No show recovery.** Two automated touches, then it goes to a person
- 7. Follow up.** Sequenced by why you lost the deal. Price and timing shouldn't get the same message
- 8. Close and collect.** Agreement and payment tracked together. Nothing closes until both land
- 9. Failed payment recovery.** You'll know the day a card declines, and the client gets contacted the same day
- 10. Reactivation.** Old leads and no shows cycle back on a schedule instead of sitting there dead
- 11. Team onboarding and offboarding.** Accounts, access, calendar, training path, first week checklist
- 12. Reporting.** One dashboard. Leads by source, speed to lead, show rate, close rate, cash collected against contracted, and who's behind on payment

Ongoing management

What the monthly covers. It's in Options 1 and 2, and it's the part that doesn't exist in Option 3.

1. Every week you get a report. What happened, what the numbers did, what came in, what I changed
2. One call a week, where we decide what's next
3. I'll watch the numbers and fix what's leaking before you notice it
4. I'll help you hire a setter, a closer, a sales manager, or a CSM. I was a recruiter before this
5. I'll work directly with your marketing person and whoever ends up on fulfillment
6. I'll keep the system current as your offer changes
7. Everything stays documented. You own the system and the documentation

Small adjustments are part of the monthly. When you want something that doesn't exist yet, it goes next in line and I'll scope it before anything starts.

What's not in scope

Content and ads sit with your marketing person. Your offer and messaging stay yours. Coaching and sales calls stay with you and your team.

For anything you need that I don't do, I'll introduce you to several people and help you pick. Landing pages, ads, webinar strategy, a coach to take fulfillment off you. You get options and my read on each one, not a single name and good luck.

Work I've done

Sales Savage. Patrick had nothing. No CRM, no tracking, no onboarding. I built his CRM, Airtable dashboards and data tracking, a social platform, and client onboarding with daily messages. Zero to \$70,000 a month.

[Hear it from Patrick](#)

TLL. Closers converting at 8%. I built a closer dictionary, an interactive script, and an offer sheet so nobody was improvising on a call. 29% within a month. I built the systems, their closer did the closing.

NMM. I run the systems on a \$200,000 a month offer. Call disposition, Slack ownership routing, full SOP rebuild.

Save Your Hair Today. Built the whole backend start to finish, before they had a single sale. Speed to lead went from hours to minutes.

Working together

OPTION 1

Build and run

\$7,500

TO START

\$3,000

A MONTH

Three month minimum, then month to month

The build, plus everything under Ongoing management. When a closer ghosts, when a campaign dies, when the numbers look off, I handle it.

Your cost stays the same no matter how big this gets.

OPTION 2

Build and run, with shared upside

\$7,500

TO START

\$2,000

A MONTH + 3%

Six month minimum

Same work as Option 1. Lower monthly, and I'm paid on what the system produces.

The 3% is on coaching revenue that comes through the system, calculated on cash collected.

OPTION 3

Build and hand off

\$12,000

ONE TIME

No ongoing

The build only. I'll document all of it, train your team, and stay available for 30 days after launch. Then it's yours.

Nothing under Ongoing management is included. No hiring, no weekly work on the numbers, nobody to call when something breaks.

Terms

Half to start, half at launch. The monthly doesn't begin until you go live. After the minimum term it's month to month, thirty days notice either way.

All three include a short video testimonial and permission to write this up as a case study, once it's running and you're seeing results.

What I need from you

Admin access on day one. Decisions inside 48 hours when I ask for one, since most of what slows a build down is waiting on an answer. Your content and assets. One call a week during the build.

Timeline

Week one is the audit. Weeks two and three are CRM, pipelines, calendars, forms and payments. Weeks three and four are the systems, Fathom, Slack and Notion. Live by day 30, dialed in by 60.

Next step

Pick an option and I'll send the agreement the same day. If you'd rather see it first, I'm happy to walk you through a live backend on a screen share.
